

Chewing Gum

In the modern world we are lucky enough to have a candy that keeps our mouth fresh, is sugar free, and accessible. However, many don't realize the harmful effects gum has.

Have you ever seen what's there on the back of your gum pack , what it's made of? It's made of PLASTIC! When you throw away your gum because the taste is gone, throw it to the trash not on the street because you are hurting the environment! It's like you were throwing away a bottle. Please think about it.
